## Projects:

### **Car Avenue - Front-End Website Development**

*Developed a front-end website for a mock car dealership, Car Avenue, as part of a course project to demonstrate web development skills.*

- **Technologies Used:** Angular, HTML5, CSS3, Typescript, Bootstrap, primeng
- **Your Role:** Designed and implemented the user interface, developed the home page and product page, created the logic for dynamic content, and ensured responsive design for optimal user experience.
- **Outcome/Impact:** Successfully created a user-friendly platform that showcases car listings and enables users to filter and view details, enhancing understanding of front-end development principles.

### **Courses and Student Management System**

*Developed a comprehensive management system for courses and students as a college project to streamline administrative processes.*

- **Technologies Used:** MySQL, PHP, Bootstrap, HTML5.
- **Your Role:** Designed the database schema, implemented server-side logic using PHP, and created the user interface using Bootstrap and HTML5.
- **Outcome/Impact:** Improved data management efficiency by enabling easy access to student records and course information, facilitating better decision-making for academic staff.
